November 5, 2007

Mr. Anthony Apodaca  
4785 Columbine Street  
Denver, CO 80216

Dear Mr. Apodaca,

This letter is in response to your concerns regarding the soil remediation work that the U.S. Environmental Protection Agency (EPA) performed at your property in 2004. Based on EPA's review of before and after photos of the work, discussions with our field crew, and visit to your property to look at your yard in October, EPA concludes that the remediation work was properly carried out and no further action is warranted.

Though your yard has been altered by the addition of a sidewalk, photos taken in 2004 show that EPA placed the sod at an appropriate height to your basement windows. Further, it is not apparent in photos or in the recent visual inspection of your yard that EPA crews significantly altered the grade of your lawn during remediation work there.

If you have any further questions or concerns about this issue, please feel free to contact either myself or Jennifer Chergo, EPA Office of Communication and Public Involvement, at (303) 312-6601.

A handwritten signature in black ink, appearing to read "Victor Ketellapper".

Victor Ketellapper
